

My Career in Electronic Servicing Technology

With a *Certificate in Electronic Servicing Technology*, graduates have the possible *career options* of the following:

- Electronic Service Technician
- Electronics Installer
- Electronics Repairer
- Office Equipment Service Technician
- Photocopy Machine Technician
- Computer Service Technician
- Audio-video Service Technician
- Alarm System Technician
- Satellite Antenna Service Technician

Electronic Services Technician

The job descriptions and job specifications for these careers are as follows:

Career Overview

Responsible for installing and maintaining electronic equipment; replacing malfunctioning components and providing labour estimates to clients.

Typical Duties:

- Install, fix and maintain a variety of home and office electronic equipment
- Diagnose a repair problem by checking there are no defective parts and consulting manufacturer's instructions and test equipment to isolate problems.
- Inspect and test electronic equipment using multi-meters, circuit testers and oscilloscopes.

Work Environment

Vocational education in electronics is required. Work may be as a bench or field technician for companies in manufacturing, transport and motor vehicles industries, service companies, department stores or repair shops or as an independent contract and or entrepreneur. Many opt to specialize in one or just a few areas of repairs.

Qualifications and Licenses

Certification in electronic engineering technology is required. While some on-the-job training may be provided, vocational training in this field may be obtained through SJPP, City and Guilds or C/NVQs.

Essential Qualities and Skills

- ❖ Strong written and oral communication skills
- ❖ Trouble shooting abilities
- ❖ Ability to use diagnostic tools
- ❖ Customer service skills
- ❖ Manual dexterity
- ❖ Computer skills (e.g. Microsoft & SAP software)
